EDUCATION

Northwestern University

Evanston, IL

BA in English Literature and Computer Science (Concentration: Artificial Intelligence)

June 2027

- **GPA:** 3.94; Dean's List 9/9 Quarters; Kaplan Institute Scholar
- **Coursework:** Computer Systems (C, x86-64), AI (Python), Scalable Software Architectures (Cloud-Native), Design & Analysis of Algorithms, Computer Programming (C, C++), Data Structures & Algorithms, Object-Oriented Programming

EXPERIENCE

The Walt Disney Company

June 2026 – Present

Software Engineer Intern, Disney+ & Hulu Streaming

Santa Monica, CA

- Developed and launched full-stack A/B experiments across Disney+, Hulu, and ESPN using TypeScript, Node.js, Koa, and EJS, delivering a 14% baseline conversion increase across a 5.1M user audience for the Extra Member upsell flow
- Built an interactive VA Chatbot interface on the Disney+ landing page using Next.js, TypeScript, and SVG animations, automating 1.2M annual sign-up queries to reduce live-agent support overhead
- Created a reusable Datadog monitoring template for Disney+'s account-sharing monetization screen, combining frontend RUM metrics and backend API logs to track subscription conversion rates, UI errors, traffic distribution, and latency
- Engineered server-driven middleware to generate standardized JSON objects for dynamic cross-platform page rendering

Climate Action Evanston

December 2024 – June 2025

Software Engineer Intern

Evanston, IL

- Designed a full-stack tracking form and data display page for a non-profit's website supporting 2500+ users, centralizing data collection and visualization into one location, cutting redundant manual updates and streamlining staff workflows by 40%
- Built Node.js/Express backend with PostgreSQL/Supabase, implementing Multer file validation and 5 REST API endpoints
- Led product integration into existing system by producing clear handoff documentation and iterating on UI/UX design through structured feedback sessions with non-technical staff, ensuring usability across diverse, cross-functional teams

Department of Computer Science, Northwestern University

May 2025 – June 2026

Undergraduate Researcher

Evanston, IL

- Formalized 4 foundational properties of strongly regular graphs in Rocq (formerly Coq) and built verified example generators in OCaml, with active development towards contributing results to Rocq's open-source GraphTheory library
- Analyzed graph theory texts and existing Rocq formalizations to choose definitions and lemmas used in proofs

PROJECTS

Exploding Kittens Online Game | Java, JavaFX, JUnit, EasyMock

Winter 2026

- Built a playable Java app featuring original card mechanics, turn-stacking attack logic and two- and three-of-a-kind card rules
- Engineered core Java model and controller classes to manage state transitions and game flow, using Test Driven Development (TDD) and Boundary Value Analysis (BVA) with EasyMock to write 300+ unit/integration tests and hit 100% code coverage

Ranklit | Figma, Swift, Supabase, Open Library API

Summer 2025 – Present

- Built a full-stack iOS app for book logging with curated lists and personalized ratings through a pairwise ranking algorithm
- Programmed 2 user-specific lists (Favorites, Want to Read) backed by Supabase RLS and book data from Open Library API
- Integrated Supabase authentication with email and username sign-up, leveraging JWT-based sessions for secure user access

Ejean's Website | React, JavaScript, HTML, CSS, Vercel

Fall 2025

- Constructed a personal website with 6+ features including client-side routing across 5 pages, an interactive email form for direct messaging, animated typewriter text, and downloadable résumé PDFs for a seamless and dynamic user experience
- Deployed site on Vercel with a custom domain and ensured full responsiveness across desktop and mobile devices

LEADERSHIP & EXTRACURRICULARS

Develop & Innovate for Social Change

Spring 2025 – Present

VP of Finance

Northwestern University

- Secured 5 grants totaling \$6,500 in 2 months, a 160% increase in funding impacting 300+ students and 30+ industry clients
- Led purchasing operations through budget tracking, oversight of 4 bank accounts, and managing approvals and reimbursements

Mock Trial

Fall 2023 – Present

Collegiate Mock Trial Competitor

Northwestern University

- Competed at UCLA, Georgetown, and UChicago and won 8th place at AMTA's 2025 National Championship Tournament
- Presented 7-min openings and cross examinations, demonstrating persuasive speaking, quick improvisation, and articulation

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, SQL, C++, C, Swift, HTML, CSS

Frameworks & Libraries: React, Next.js, Node.js, Koa, Express, Tailwind CSS, GraphQL, EJS, SwiftUI, Jest, JUnit

Tools & Platforms: Git, AWS (S3, RDS), Docker, Supabase, PostgreSQL, MySQL, Datadog, Figma, Jira
